

2023 YEAR IN REVIEW

The realization of Ynfarm, now raised as the world's largest vertical farm, with its impressive dimensions of 36 meters in height and an expansive area of 45,000 square meters, marks a significant milestone for the FARMYNG project. **The first mealworms, carefully selected, have been introduced, thus initiating the start of a sustainable production.** By the year 2024, Ynfarm sets an **ambitious goal to deliver its first customers** by providing high-quality ingredients for both animal and plant nutrition. This crucial step embodies a transition towards a futuristic and responsible agriculture, **thanks to every FARMYNG partners.**

EVENTS

1 The **European Federation of Animal Science (EAAP) Conference** held in Lyon, France, from August 26 to September 1st, was attended by:

- MG2MIX were present to showcase their **research on Tenebrio molitor premixes.**
- CEA presented **the genome and population genomic analysis** of Tenebrio molitor.
- Ynsect conducted a conference to **evaluate the environmental impacts of its products** using an environmental Life Cycle Assessment (eLCA).

2

FARMYNG showcased at the major international events in the biotechnology & circular economy sectors: **IFIB 2023 & ECOMONDO 2023**

International Forum on
Industrial Biotechnology
and Bioeconomy

IFIB 2023 (Florence, Italy, 28-29 September 2023)

The International Forum on Industrial Biotechnology and Bioeconomy brings together **global bioeconomy stakeholders to discuss renewable, biological resources**. Over 220 participants sought partners for collaborations, business development, licensing agreements, joint ventures, research projects, and experience exchange. The project was presented by Ciaotech / PNO during the online and on site poster session organized in the framework of the interesting agenda of the conference.

ECOMONDO 2023 (Rimini, Italy, 26-29 October 2023)

This international event for **green and circular economy technologies, services, and industrial solutions**, showcased FARMYNG at the conference "Waste as Resource: Technological advancements in waste treatment and resources recovery." **Around 500 industry and RTOs** visited the Ciaotech / PNO booth to discover the ambitious goals and results of the FARMYNG project.

3

Bioeconomy for Change (B4C) played a pivotal role in **two significant occasions**, showcasing the FARMYNG project:

On September 21st, Bioeconomy for Change (B4C) hosted a **webinar discussing Feed & Pet Food News**, featuring a spotlight on the FARMYNG project and showcasing recent advancements.

On December 5-6, B4C was involved in the **CBE JU Stakeholder Forum**, representing the European projects in which we are partners. Anticipating 500 participants. 

4

Decembre 3-5, both **product packaging and raw material** were displayed in COMPO stand at **PAYSALIA fair** in Eurexpo Lyon.

5

Events co-organized by:

- The **FBGS 2023** 
- The **Realise-Bio & FARMYNG forum**, an online event 
- On September 13, CLIB visited **the Ideenfutter Expo 2023** in Germany, showcasing innovative food trends and discussing the food industry's changes in Europe.

Horizon2020
European Union Funding
for Research & Innovation

This project has received funding from the Bio Based Industries Joint Undertaking (JU) under grant agreement No 837750. The JU receives support from the European Union's Horizon 2020 Research and Innovation Programme and the Bio Based Industries Consortium.

PRESS

Ÿnfarm has been featured in reports **broadcasted on two major French television channels**: TF1 and M6.

TF1, 8:00 PM news on December 7th

M6, Zone Interdite on December 10th

NEWS FROM OUR PARTNERS

Ÿnsect launched **Sprÿng**: a Sustainable Insect-Based **B2B2C Brand for the Pet Food Market**. The brand featured premium ingredients that combined scientifically proven benefits with a low environmental impact. Sprÿng offer easy-to-incorporate, neutral-tasting, odorless, and light brown ingredients, **designed with the needs of pet food manufacturers in mind**.

Eurofins Nutrition Animale France has opened a **new laboratory** in Nantes since February 2023, supporting industries in Feed, Petfood, and Insects. The expert team can now process samples directly within the laboratory, analyzing Ash, Moisture, Fat Content, and Crude Fiber under COFRAC Accreditation. This new laboratory **allows for innovation, custom methods, and continued development** for and with FARMYNG new appreciation of insects.

SEE YOU IN 2024

Some **key dates** from our partners in 2024:

will be celebrating
its **35th** *Birthday* !

will be attending the **SIVAL event**
from January 16th to 18th.
